1. NATURE OF OPERATIONS AND GOING CONCERN

Grounded Lithium Corp. ("Grounded" or the "Company") was incorporated on October 26, 2020 by Certificate of Incorporation issued pursuant to the provisions of the Business Corporations Act (Alberta). The Company's principal business is the acquiring, exploring and developing of mineral properties in Canada, with a specific focus on lithium. The development of these assets includes processes to purify and recover lithium metal directly from brine liquids. The Company owns and controls approximately 86,000 net hectares with plans to selectively grow this land position through subsequent transactions.

The head office is located at Suite 500, $400 - 5^{th}$ Avenue S.W., in Calgary, Alberta and our registered office is at Suite 4000, $421 - 7^{th}$ Ave SW, Calgary, Alberta.

Going Concern

These financial statements have been prepared on a going concern basis in accordance with International Financial Reporting Standards ("IFRS"). The going concern basis of presentation assumes the Company will continue to operate for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. The Company is in the exploration stage and has not earned revenue from operations. During the six month period ended June 30, 2023, the Company incurred a net loss of \$2,626,751 and had net cash used in operating activities of \$2,138,424. In addition, the Company has a deficit of \$9,981,904.

The above factors indicate that a material uncertainty exists that may cast significant doubt about the Company's ability to continue as a going concern. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. This assessment is based upon planned actions that may or may not occur for a number of reasons including the Company's own resources and external market conditions.

The Company's ability to continue as a going concern, realize its assets and discharge its liabilities in the normal course of business, meet its corporate administrative obligations and continue its exploration activities in the 2023 fiscal year, is dependent upon management's ability to obtain additional financing, through various means including, but not limited, to equity financing. No assurance can be given that any such additional financing will be available, or that it can be obtained on terms favourable to the Company.

These financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis were not appropriate for these financial statements, then adjustments would be necessary to the carrying amounts of assets and liabilities, the reported expenses and the classifications used in the statements of financial position.

For the six-month periods ended June 30, 2023 and June 30, 2022

2. STATEMENT OF COMPLIANCE AND BASIS OF PREPARATION

These condensed interim financial statements are unaudited and have been prepared in accordance with IAS 34, "Interim Financial Reporting". The condensed consolidated interim financial statements do not include all the information and footnotes required by IFRS for a complete set of financial statements. The condensed interim financial statements have been prepared using the same accounting policies and methods of computation as disclosed in the Company's December 31, 2022 financial statements except as stated below and should be read in conjunction with those financial statements. The preparation of the financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts and expenses during the reported period. Actual results may differ from these estimates.

The condensed interim financial statements were authorized for distribution by the Company's Board of Directors on August 24, 2023.

The purchase price of \$425,000 (before closing adjustments) was comprised of cash consideration of \$175,000 and the issuance of 779,557 Common Shares at a fair value of \$250,000. Exploration and evaluation assets consist of the Company's exploration projects for which the determination of proved or probable reserves is indeterminable at this time

Production testing/completion costs relate to the Company's first lithium test well and fluid sampling from oil and gas operators' wells within the greater Kindersley Lithium Project area, to better define grade and deliverability parameters. The majority of the costs were incurred for service rig time, production testing and equipment rentals.

As at June 30, 2023, no impairment indicators were identified and therefore an impairment test was not performed.

8. DECOMMISSIONING LIABILITY

The Company's decommissioning provision results from ownership interests in lithium assets including well site, gathering systems and processing facilities. The total provision is estimated based on the Company's net ownership interest in all wells and facilities, estimated costs to reclaim and abandon these wells and facilities and the estimated timing of the costs to be incurred in future years. The Company estimated the total undiscounted amount required to settle its decommissioning provision at June 30, 2023 to be approximately \$10,200 (December 31, 2022 - \$10,200) with the abandonment expected to commence in 2042. A discount rate of 3.09 percent (December 31, 2022 – 3.04 percent) and an inflation rate of 2.10 percent (December 31, 2021 – 2.10 percent) was used to calculate the decommissioning provision.

A reconciliation of the decommissioning provision is provided below:
